

We're now in Tokushima Awaodori airport.

This is a picture of Tokushima Awaodori airport.

We were the first to fly.

It takes about one hour from Tokushima to Tokyo by plane.

We had soup on the plane and took in the view!

While on the plane we were able to see Mt. Fuji.

It was fun to be on the plane.

We're now Tokyo University.

We went to the food court in Tokyo University.

Tokyo University is famous for Akamon ramen.

There is a gift shops near the food court.

We can buy stationery, handkerchiefs and souvenirs there.

I saw Akamon. It is big and beautiful.

I want to go there again.

This is picture of kaminarimon gate.

After walking a picture ,we went to Sensoji Temple.

There were a lot of people. We prayed at the temple for good health,happy life,success and good fortune. Next we walked along Nakamise street. We enjoyed walking and looking at many gift shops. It was interesting.

We're now in Sumida aquarium. It is located inside the Sky Tree. The tanks contained various species of fish, including penguins and jelly different types of fish. It was fish. It was interesting to see particularly beautiful to see so many penguins swimming in the large tank. Afterwards, we went up to the Tokyo Sky Tree. The view from there was the most spectacular I have ever seen. Afterwards, I bought souvenirs and other items at Sola Machi on the lower floor. I think you will have a wonderful experience, and I encourage everyone to go.

We're now in Capitol Building.

It was a great learning experience.

One of my friends has a role of minister.

There were all kinds of rooms there.

I have seen this a few times on TV.

Seen from the front, it was big.

I was surprised to see it for the first time.

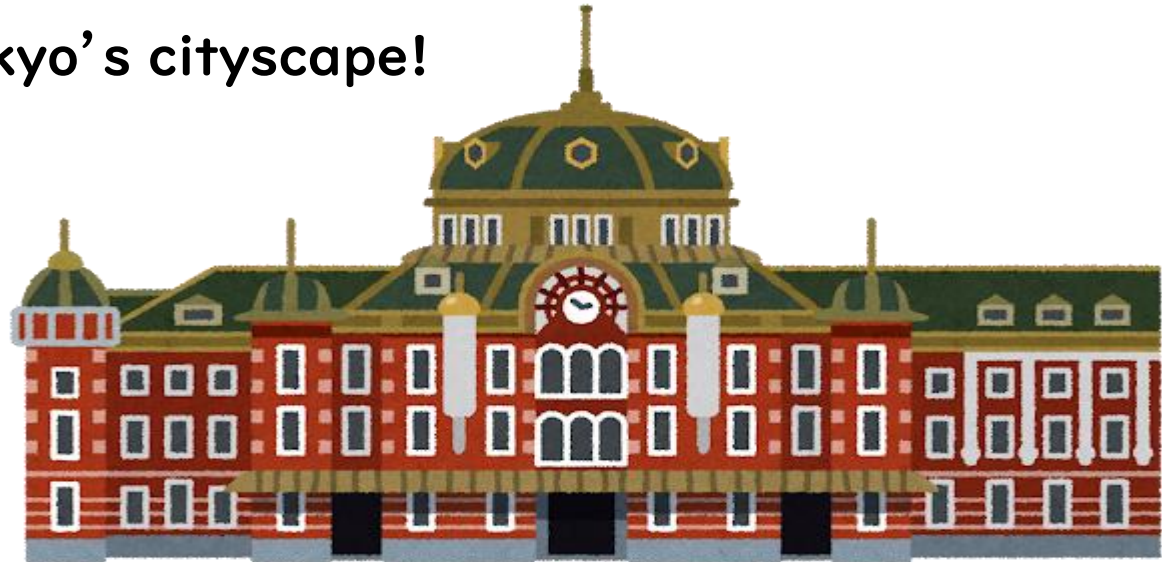

I really enjoyed it.

This is a picture of Meiji Shrine. It's a very famous building. There were a lot of people in Meiji Shrine. It started to rain so, I bought a charm. After going to Meiji Shrine, we went to Harajuku. There were a lot of people in Harajuku too. It was raining more than it did at Meiji Shrine. I hated getting my feet wet. After looking at sneakers at a sneaker store, we had lunch, and afterwards some of us had crepes. It wasn't much fun because of the rain.

This picture is Tokyo Station. Tokyo Station was built between 1908 to 1914 and stands approximately 335 meters high. We had free time there. The overhand dome of Tokyo Station was very beautiful. Tokyo Station also has a variety of other stores, including souvenir shops and restaurants. The buffet we had there was very good! We can also take the Hato bus at Tokyo Station, from where the view of Tokyo is wonderful! Ride the Hato Bus and enjoy Tokyo's cityscape!

This picture is of Japan science future museum.

It's an interesting museum.

The National museum of Emerging science and innovation aims to understand what is happening in the world from a scientific perspective, and to think about what kind of future we will create from now on, A science museum where you can think and talk about things. I have a lot of science experiences. Please visit the Japan science museum of Emerging Science and innovation.

We're now in SonaAreaTokyo Sona area Tokyo is a disaster prevention experience learning facility centered on the "Tokyo Direct72r TOUR", a disaster prevention experience with

Tablets. There was a diorama in the but it started with a staged evacuation on with the lift shaking on the way. In the basement quiz appeared Ona tablet and you had to answer the questions to proceed it was surprisingly easy The atmosphere was realistic and scary though.
