

A photograph showing 20 small, brown, irregularly shaped objects, likely fossilized plant remains, arranged in a grid-like pattern on a dark, textured surface. The objects vary in shape and size, some appearing more elongated and others more rounded or fragmented. They are all a similar brownish-tan color, suggesting they are made of a similar material or have been treated similarly. The background is a dark, mottled grey surface.

A photograph of a classroom during a lesson. A male teacher in a white shirt and tie stands at the front, gesturing towards a large digital screen on the left. The screen displays a diagram of a cell with various organelles labeled. Students, seen from behind, are seated at desks with blue chairs. The classroom has a blackboard, a clock, and some notices on the wall.
